

Vandal Resistant Proximity Reader

AC-1201

The AC-1201 Vandal Resistant Proximity Reader by Controlsoft is suitable for internal and external applications. It has an attractive metal housing that makes it look good whether it is installed outside the boardroom or at the entrance gate. It is certain to blend in with the architectural design of any building.

A bi-colour (Red/Green) LED provides visual feedback to the user if access is allowed (Green) or denied (Red). In addition, a piezzo buzzer provides audio feedback that the card / tag has been identified.

The electronics are potted with UL-approved potting compound that protects the reader from harsh environmental conditions.

Ordering Information:

Part Number: AC-1201

Features

- Read range: 6 to 8cm
- Red / Green LED for visual feedback
- Piezo buzzer for audio feedback
- Wiegand 26 bit Output
- Proximity technology—no contact required
- Electronics potted with epoxy for environmental protection
- Attractive housing
- Suitable for internal & external applications

Specifications

- Voltage: 12 VDC
- Frequency: 125Khz
- Current requirement: 250mA
- Output formats: Wiegand 26 bit
- Operating temperatures: -30° to 65° C
- Operating humidity: 0 to 95% non-condensing
- Weight: 800g
- Dimensions: 93mm (Diameter) x 26mm (Depth)
